Factory Organizations

4. "The Communist Party, Youth Organization, Labor Union and the Organization of Friendship with the USSR were all represented at the Vorosilov Works.

Shifts

5. "The Vorosilov Works operates in shifts from 0600 to 1400 hours, and from 1400 to 2200 hours. During the week there is also a night shift.

Security Measures

6. "Security measures at the factory were strictly enforced. A worker was not permitted to enter a section unless specifically sent there. Each factory section had its own entry permit (pass), and at the entrance to each section there was a guard. In all, there were 350 armed guards at Vorosilov.
7. [redacted] on June 10, 1953, there was an espionage trial, because a guard had seen a 19 year old apprentice taking photographs in the factory. The trial revealed an underground group consisting of four workers and three apprentices. The 19 year old apprentice was condemned to death, and the others were sentenced to seven years imprisonment each.
8. "The Bratislava - Zilina highway which is seven to eight meters wide, runs along the factory, as do two rail lines."

Legend: Sketch of Vorosilov Works; (Enclosure B)

1. Main entrance.
2. Guardhouse, brick construction, 50 by 10 meters.
3. Garage, brick construction, 100 by 10 by 3.5 meters.
4. Administration offices, cafeteria; two-story building: 250 by 45 meters.
5. Emergency entrance: gate, 2 by 2 meters.
6. Four-story underground building, 200 by 100 meters, and 12 meters under the ground. Construction is concrete. Ground surface over this building is grass. **Antiaircraft** guns are produced in this building.
7. Ventilators, 2 meters in diameter and 5 meters high.
8. Concrete building, constructed in 1952: 80 by 40 by 6 meters.
9. Apprentice School: four brick buildings, each 50 by 12 by 4 meters.
10. Foundry; concrete construction: 150 by 80 by 12 meters.
11. Brick chimneys, 20 meters high.
12. Offices; building is 100 by 20 meters.
13. Railway junction.
14. Prototype buildings, 150 by 100 by 12 meters. Tests are being performed here.
15. Concrete building, producing spare parts for tanks: 150 by 80 by 12 meters.
16. Concrete building, for bridge construction: 150 by 80 by 12 meters.
17. Concrete building, producing spare parts for **antiaircraft** guns.
18. Garage for all engines used at the factory.
19. Three brick chimneys, 25 meters high.
20. Brick wall, 3 meters high.
21. Concrete highway 4 to 5 meters wide. Highway runs into the ammunition factory.
22. Asphalt highway 7 to 8 meters wide running from Bratislava to Milina.
23. Concrete highway crossing over the railway junction: 10 meters long, 5 meters high.
24. Rail line Bratislava - Milina.
25. Gravel road, 4 meters wide.
26. Repair shop of Vorosilov Works.
27. Employee residences.
28. Railway station.
